

WASTE REDUCTION TIPS

MAKE RECYCLING CONVENIENT

Place appropriate containers in specific areas of your business: paper recycling bins in copy rooms, food waste collection containers in kitchen areas, etc. Make Recycling Attractive Use durable, attractive, color-coordinated containers to promote recycling.

REUSE

Promote reuse of office supplies by providing space for collection and exchange of reusable materials (file folders, paper clips, etc.).

WASTE PREVENTION

Avoid printing where possible (see below). When printing drafts, use the back side of paper that was already used for one-sided copies. Better yet, print everything two-sided and cut your paper purchases in half.

Reduce operating costs and green your business today!

For every dollar spent on printing documents, companies typically incur \$6 in handling and distribution costs, according to a Xerox study. This study also found that businesses typically discard about half of their documents within 24 hours of printing. Recycling this waste helps, but companies should also examine their systems for waste-reducing opportunities. more information.

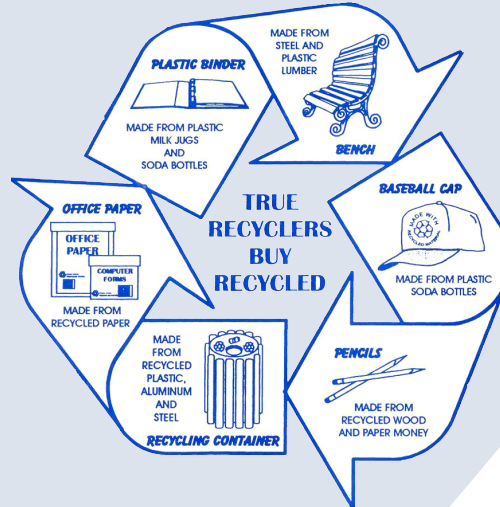

YOU CAN GO GREEN BY:

purchasing recycled and recyclable products.

use green building methods, go to <http://your.kingcounty.gov/solidwaste/greenbuilding/index.asp> for more information.

Simple steps for setting up a recycling program:

1. Examine your recycling options
2. Choose a level of service
3. Spot locations for bins
4. Inform your employees
5. Monitor and adjust as needed

For information on how we can help with these steps, contact:

COMMERCIAL RECYCLING PROGRAM

How we can help your company stop losing money, impress customers, & win awards.

ANNOUNCING A NEW PROGRAM FOR BUSINESSES

Allied Waste Services is starting a new program designed to dramatically increase recycling in the City of Kent. This program provides a one-stop service to help you recycle a variety of materials, including:

- ♻️ paper (office paper, cardboard, other paper)
- ♻️ plastic (bottles and bags/film)
- ♻️ glass (bottles and jars)
- ♻️ metal (cans and scrap metal)
- ♻️ food waste and other organics

Stuck on Space?

We get it. Let's talk about making room for the containers you choose.

YOU ARE INVITED TO . . .

- ♻️ **STOP LOSING MONEY:** the same amount of waste can be recycled for half the cost of throwing it away as garbage.
- ♻️ **BE SUSTAINABLE:** not only does recycling help make sure that your business has the resources to operate in the future, it also helps ensure your children will have the resources they will need in the future.
- ♻️ **IMPRESS YOUR CUSTOMERS:** more and more, recycling is viewed as a normal part of life, and your customers (and employees) expect to see you do it as well.

CALL US . . .

Call us for more information:

253-872-7220

We can sign you up for the recycling program by phone, or we can arrange to have one of our staff drop by to evaluate your needs and cost savings.

WE CAN HELP YOUR BUSINESS GO *green!*
